Box No. IV Text of the abstract (Continuation of item 5 of the first sheet)

Electrical circuits (4) operating at high frequencies will, due to their nature often radiate electromagnetic energy. The problem gets worse as the frequency of operation gets higher, as the radiation wavelenght becomes correspondingly shorter, and hence becomes closer to a lenght at which the package itself will be resonant. In order to avoid cavity mode resonance a cut off member (10) attached to the lid (9) is introduced into the package cavity (2). The cut off member comprises a dielectric substrate coated with a conductive layer. The package cavity (2) could also be filled with a dielectric filler that makes the package appear electrically larger than its physical dimensions due to the shortening of the wavelenght of the electromagnetic fields within a dielectric of increased dielectric constant.

A. CLASSIFICATION OF SUBJECT IPC 7 H01L23/552

H01L23/24

H01P1/211

H05K9/55

According to International Patent Classification (IPC) or to both national classification and IPC

## **B. FIELDS SEARCHED**

Minimum documentation searched (dassification system followed by classification symbols)

IPC 7 HO1L HO1P HO5K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

EPO-Internal, PAJ

Category °	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
<b>x</b> .	US 2002/067313 A1 (KONDOH HIROSHI ET AL) 6 June 2002 (2002-06-06) paragraph '0031!; figure 1	1-4, 6-12, 18-20

Х	Further documents are listed in the	continuation of box C.

γ Patent family members are listed in annex.

- Special categories of cited documents:
- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- 'E' earlier document but published on or after the international filing date
- 'L' document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other spectal reason (as specified)
- O' document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filling date but later than the priority date claimed
- \*T\* later document published after the International filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*&\* document member of the same patent family
